Functionality	WF Approval Process
Completed	Enable Alert / Enable Notification.
Version	27.07.2022

## Verified and Released On

27th July 2022, 28th July 2022

# Objectives and Steps

#### **OVERVIEW & PURPOSE**

With this release we have come with an enhancement in WF Approval Process of Enable Alert / Enable Notification.
Now we have the functionality to Add and Remove the Email's
Next Step Email - Tab Name - [Enable Alert]
Informational Email - Tab Name - [Enable Notification]
By Default if user add any roles it will be auto selected in above mentioned both Tabs.

#### Enable Alert /Enable Notification:

- From the side menu,click on Settings Icon,select"Approval Process"
- Add an Approval Flow, give the mandatory fields like Name, Description and select Entity as "Wireless Form".
- Under the table, give the Step Name and select Roles.
- User can see the new feature of "Enable Alert" drop down and "Enable Notification" drop down.
- Enable Alert facilitates the user to send alert message to next step user designated for the Approval Process
- Enable Notification facilitates the user to send informational messages to concerned roles.

• After giving all the mandatory details, submit the process.
