| Functionality | Customer Bill To Ship To filter |
| Completed | WIRELESS FORMS - Customer by Location Filter |
| Version | 21.12.08 |

Verified and Released On

8th December 2021, 8th December 2021

Objectives and Steps

OVERVIEW & PURPOSE

In this release we have made the following enhancement

- Given a dropdown filter for the item and customer by location on template and form side.

● **Wireless Forms - Customer by Location**

Enhancement

- Go to Wireless forms
- Drop the Dropdown Field on Template.
- Select the field property Customer by Location
- Here the user will have the option to show the address filtered on the basis of Bill To and Ship To

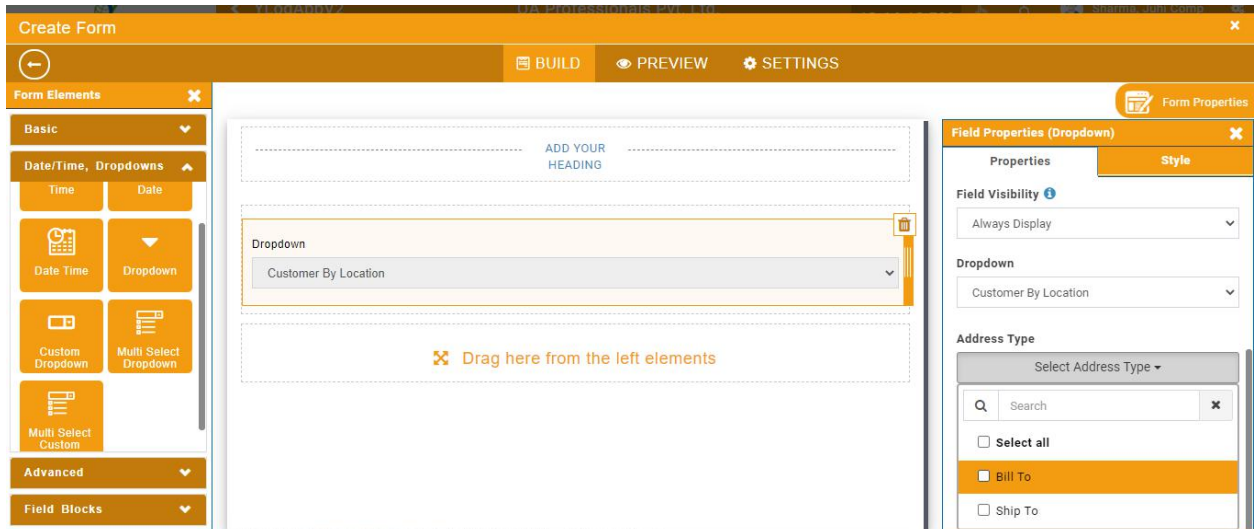

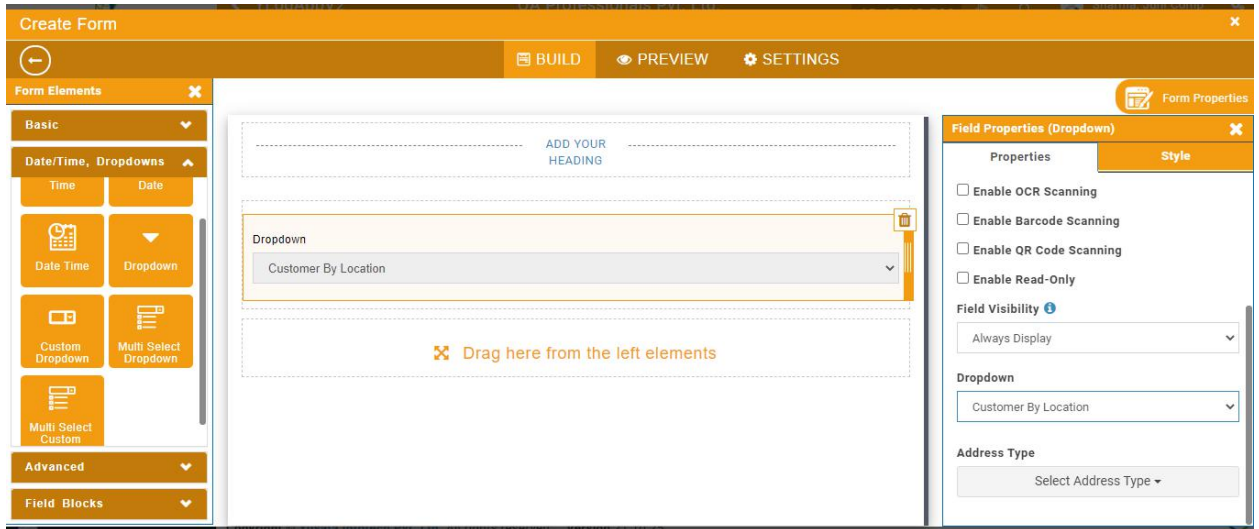

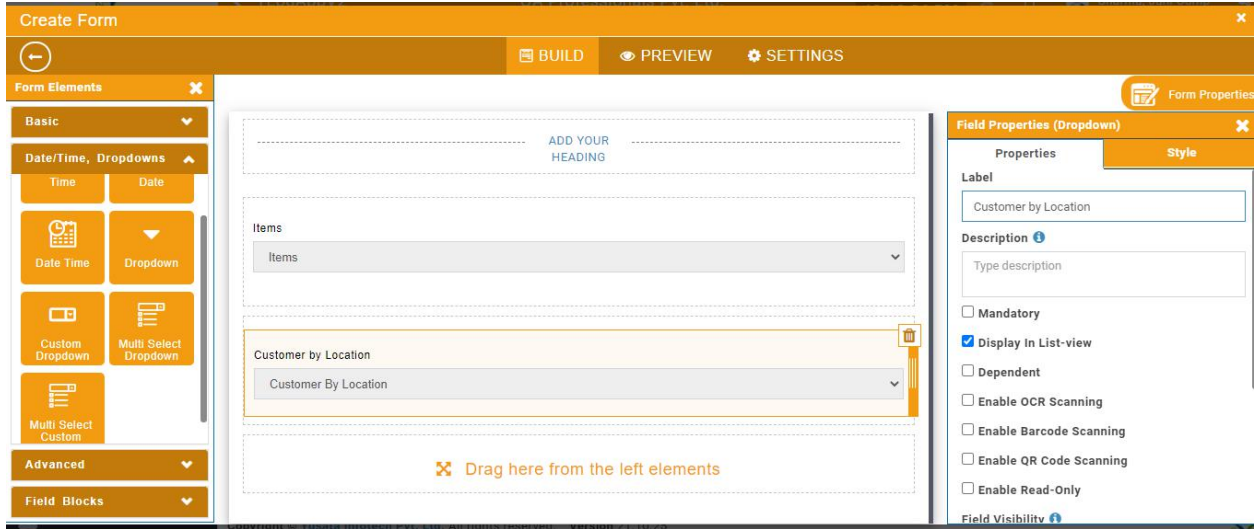

Address Mapping(Customer2, Juhi)

| Address(Geofence) | Bill To | Ship To/From | Effective from | Effective to | Action |
|--|-------------------------------------|-------------------------------------|--|-------------------------------|-------------------------------------|
