

# RELEASE NOTES

We have enabled YLogForms for continuous GPS tracking (based on configured frequency) for driver.

## Verified and Released On

08th March 2021

## Objectives and Steps

- **Track and Sync the user location on PORTAL.**

The driver should be logged in on the yLogForms mobile application and must have internet access on the device.

Settings > Location > ON (Vary on device settings)

- LOGIN

- Login with the driver user (Figure 1.0)
  - If vehicle is already assigned from portal then the user should have the vehicle selected after login
  - If the vehicle is not assigned from the portal then the new vehicle will be created on the portal with the username.(Figure 1.1)

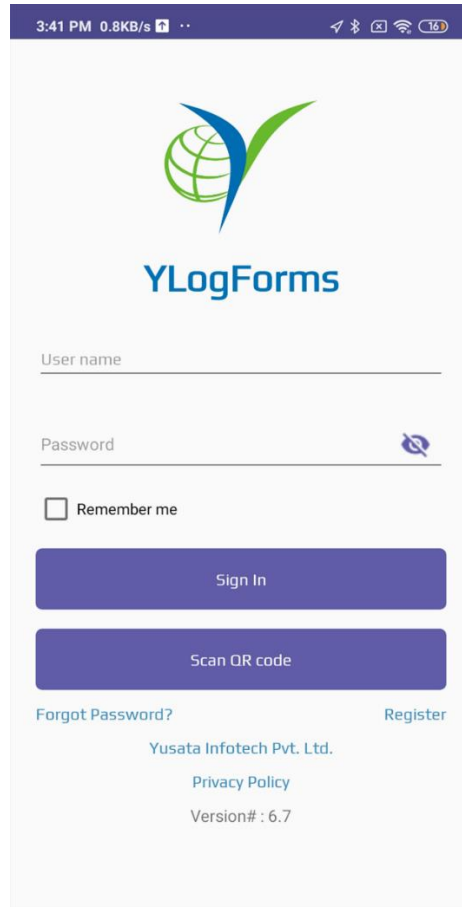

Figure 1.0

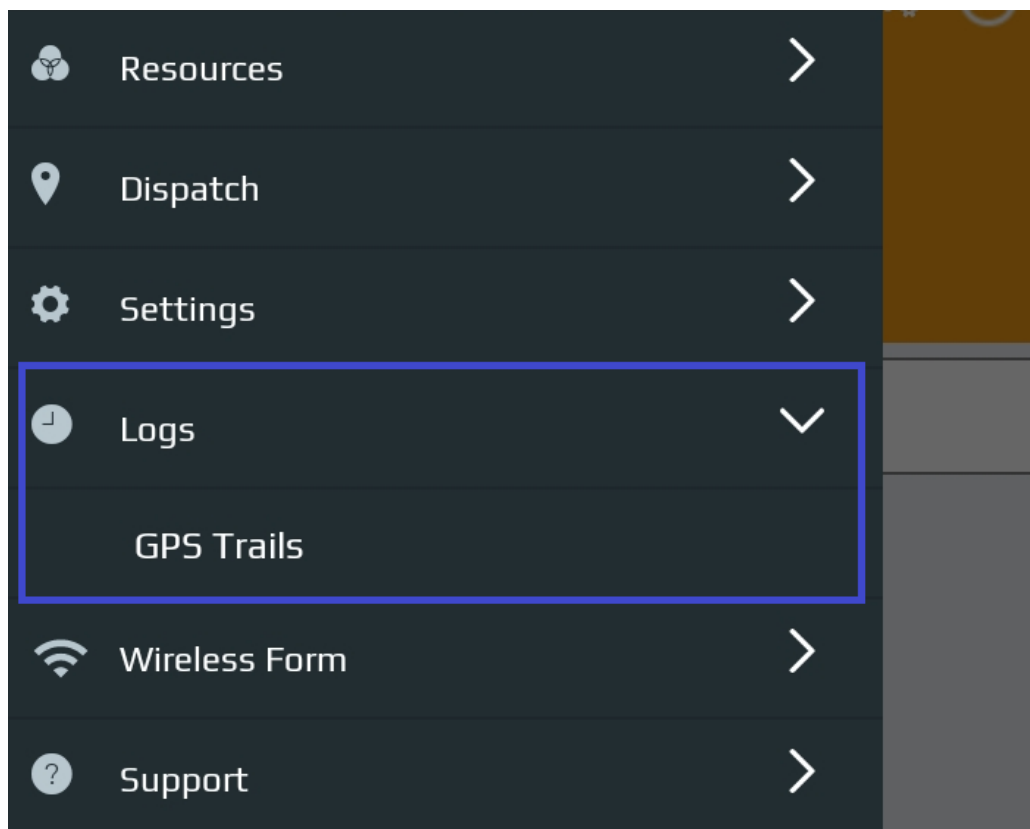

This vehicle has been created after the driver login, because the driver has not been assigned with a vehicle from portal

Vehicle#	Fuel Type	Vehicle type	VIN	Drivers	Department	Vendor	Home Base	State
Driver0022		Other	Driver0022	222, Driver Uni	Transportation(TRANSPORTATION)			Active
Akki8019_27		Other	Akki8019_27		Transportation(TRANSPORTATION)			Active
driver4321		Other	driver4321	2	Transportation(TRANSPORTATION)			Active
dkalra5March		Other	dkalra5March		Transportation(TRANSPORTATION)			Active

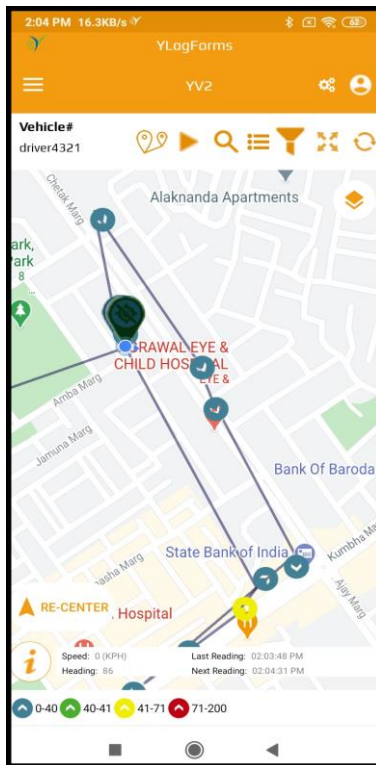

Figure 1.1

- **Steps**

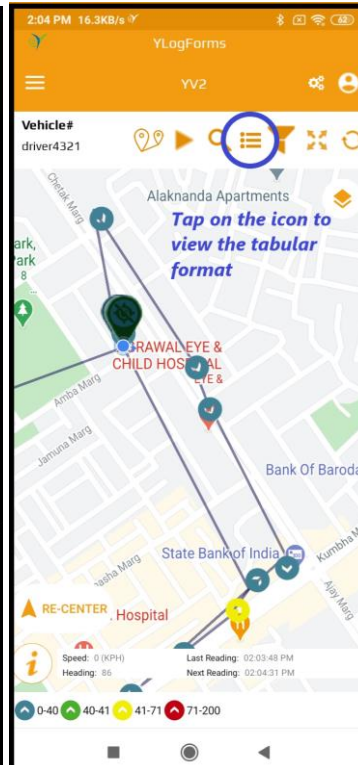

- Login to the mobile application- YLogForms
- Now tap on hamburger icon to open the side menu
- Click on the Logs menu options
- Click on GPS Trails(**Figure 1.3**)
- Here the user will be redirected to the Map Screen (First user will have the map view to show the vehicle locations on the screen)(**Figure 1.4**)
- If user wants to view the tabular view of all the locations - click on the tabular icon on the top (**Figure 1.5**)
- User will have a popup enabled on the screen with the list of locations sorted in the chronological order(latest on top and oldest on bottom)(**Figure 1.6**)

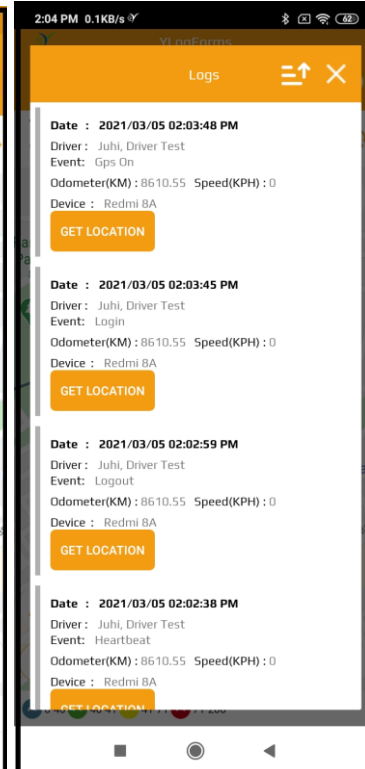

(Figure 1.3)
