

# **RELEASE NOTES**

## TASKS

Functionality	Default values on FORM
Completed	WIRELESS FORMS
Version	21.10.13

### Verified and Released On

30th September 2021, 18th October 2021

### **Objectives and Steps**

#### **OVERVIEW & PURPOSE**

This feature enables the user to set default values for the radio button, checkbox and custom dropdown on the template side for Forms.

#### • Wireless Form - Add Template with addable group

- Create a template, Select the Approval process (if required) and drop the field as required.
- Drop Radio Button/ Checkbox/ Custom Dropdown fields on the form as required
- Enter the multiple options for the same as required
- Select the default option from the dropdown on the property field for the checkbox/radio button/custom dropdown fields respectively as required -labelled "Select Default Value"
- Here the user will have a dropdown from which they can select Add/ Edit/ Approval(if the approval process has been selected while creating the template).
- Click on the Submit button to save the template.
- While adding / updating the forms the default selection should be visible on the screen for the respective options
